Special collection price for all 6 pairs	\$10.00
Insulated shipping cans	\$1.25

ROBERTSON, MISSOURI

DIRECTIONS TO CUSTOMERS

WHEN WRITING IN REGARD TO YOUR ORDERS

BE SURE TO MENTION ORDER NUMBER

Forwarding

All prices quoted in this catalogue are f.o.b. St. Louis. We do not prepay any shipments or parcels. Some articles such as plants, fish food, heaters, remedies, supplies, air pumps and ornaments can be sent by parcel post insured.

Kindly add sufficient postage for insurance. We do not guarantee live snails sent through the mail. You will have to insure these parcels and file your own claims for losses.

Live fish can be shipped by regular express and air express. Glass aquariums and other large glass items are best sent by express because they are automatically insured. Do not remit express charges to us but pay the express charges when shipment is delivered to you.

How We Ship Tropical Fish

For cold weather shipments, we can supply chemical heating pads at 75c each. You simply order one of these heating pads when you order tropical fish during the wintertime. Insulated shipping containers for winter shipments are \$1.25 each. These containers and chemical heating pads are not returnable for credit.

We Are Not Liable For Damage That Occurs In Transit

We are not liable for merchandise ordered shipped by parcel post or express and customers agree to file their own claims for damaged shipments. In case of parcel post shipments, sufficient money should be remitted to cover insurance of these parcels. We are not liable for any damage to livestock shipments. We do not guarantee live delivery of livestock and ship all livestock entirely at your risk. Should any losses occur the only thing to do is to call your local claim department of the Railway Express Agency or whichever transportation company handles the shipment. Get an inspection report made out on form No. 679. Pin your invoice to this form and file your own claims. We always place a few extra fish in the shipment to offset any minor losses so it will not be necessary to file claims.

We Guarantee Safe Arrival of All Fish Aquariums

Should you get a fish aquarium in a damaged condition, do not return it but simply notify us and send us the inspection report. Do not return the aquarium. We will tend to that and see that you get another fish aquarium free of charge so that you will not have to pay additional express charges. We contact the Railway Express Agency and we file claims for all fish aquariums which are damaged if shipped by express only. We replace damaged fish aquariums free of charge simply upon receipt of your inspection report signed by your Railway Express Agent.

Summer Shipping Cans For Tropical Fish

It is best to ship tropical fish in insulated containers the year round. We can supply these insulated containers which are not returnable for credit at \$1.25 each.

Plastic Bag Containers

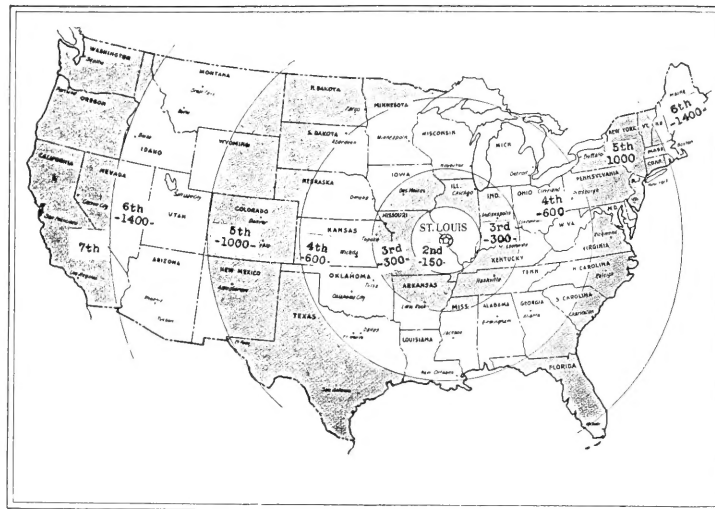

Tropical fish can also be shipped in plastic bags packed in corrugated boxes. These containers are somewhat lighter than the regular shipping can container. Plastic bag shipping containers can be supplied at \$1.25 each complete with insulation and are not returnable for credit.

Taxes

Missouri residents must add 2 per cent retail sales tax to all orders. All federal, state or local taxes imposed after this catalogue is printed will be added to all prices.

Cash with Orders

Please send sufficient money with order to cover the whole bill. We decline to ship "Collect on Delivery" unless 50 per cent remittance be made to guarantee acceptance.

PRICES: ALL PRICES IN THIS CATALOGUE ARE SUBJECT TO CHANGE WITHOUT NOTICE

OUR LOCATION, TERMS, POLICIES

We are located 12 miles west of St. Louis City Limits, west of the Municipal Airport, near the junction of Highway 66 and 140. The Lincoln-Mercury Assembly Plant is located on the east side of this Junction. To reach our place, turn west on Utz Lane and go to the end; it is only about half a mile long, and turn north on Howdershell Road about one half mile. You will find our place on the west side of Howdershell Road. There is a large brick chimney with our name 20 feet long.

WE HAVE NO RETAIL STORE

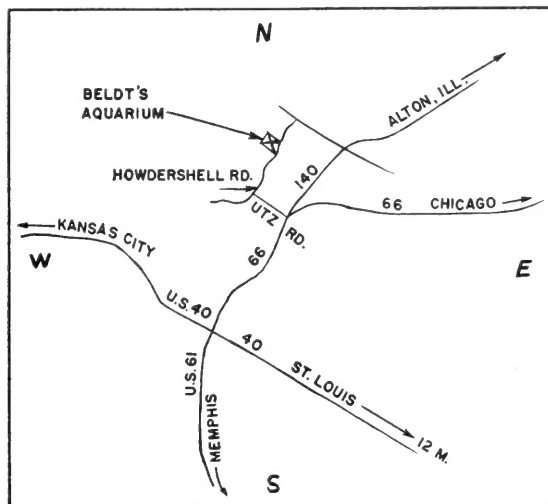

Our business is mainly a wholesale and mail order business. Inasmuch as we operate on several acres of ground and our merchandise is perishable and cannot be kept on a shelf, it is advisable to mail your order several days in advance, together with your remittance, so that you can take advantage of

OUR PICK-UP SERVICE

If you are living within driving distance, and would like to pick up your order, we shall be glad to accommodate you, and get the order ready for you. You can give us the pick-up date and we will have the order ready just as long as the order gets here at least three days in advance.

BUSINESS HOURS

Our office and shipping department are open on weekdays from 8 a.m. until 4 p.m., and on Saturdays from 8 a.m. until 11 a.m. Closed Sundays and holidays. If you want pick-up service on Saturday afternoons between 2 and 4 p.m. and Sunday mornings between 8 and 10 a.m., we can accommodate you by keeping your order at the hatchery. Someone is there during these hours to take care of various

necessary chores, so we are able to accommodate you on a Saturday afternoon or Sunday morning, but not on any c.o.d. business; only on orders which have been paid for in advance.

GOLDFISH PICK-UPS

We cannot extend goldfish order pick-ups on Saturday afternoons or Sundays, as we have no facilities in our tropical fish hatchery to keep these in cans; therefore all goldfish orders must be picked up during the time the department is open before 11 a.m. Saturdays.

VACATION NOTICE

It is next to impossible to stagger our vacation time this year; therefore we have decided to close for vacation the first two weeks in July. Telephone TEmple 7-3350.

A FEW LETTERS FROM SATISFIED CUSTOMERS

When you send us an order you are not taking a chance. We have been shipping aquariums, water plants and fancy fish for over thirty years. We know how to pack and promise to ship only the best of merchandise. We pride ourselves on the quality

goods we ship. We get letters from coast to coast from our customers. Even a common, ordinary fish globe which was sent by parcel post to Panama arrived in good order. Read these letters, and you, too, can rest assured of satisfactory dealings and prompt service.

Beldt's Aquarium, Inc.
Robertson, Mo.

I have received my order of fishes in good condition. They are all satisfactory and very beautiful. Since they have arrived, three females have given me a nice family. Many thanks for the extra fishes added to my order. You will surely have my patronage when in need of nice breeding fishes.

Yours truly,
Mrs. Leon Morel,
Quebec City, Canada.

Beldt's Aquarium, Inc.
Robertson, Mo.

Please rush me your catalog of tropical fish. I had the pleasure of buying my tropical fish, goldfish and water lilies from you last summer. They all arrived in good condition.

Guy Walton,
Pittsburgh, Pa.

Beldt's Aquarium, Inc.
Robertson, Mo.

The 25 neon tetras arrived Tuesday the 13th in excellent condition. Thank you for your prompt service.

Mrs. Frank Mueller,
Hialeah, Fla.

Beldt's Aquarium, Inc.
Robertson, Mo.

The No. 72 aquarium arrived in good condition. I am very pleased with it as well as your promptness in filling orders. The aquarium is exactly the right size.

Sincerely yours,
Hunter C. Belt,
Lexington, Ky.

Beldt's Aquarium, Inc.
Robertson, Mo.

I received the dip tube and feed ring today, and want to thank you for the fine job of packing, and also the very nice tube and ring. I always send to you for my aquarium needs.

Sincerely,
Miss Judy Nelson,
Stevens Point, Wisc.

Beldt's Aquarium, Inc.
Robertson, Mo.

The Thiberg air pump works wonderfully and the fish love it. Everyone admires our aquarium, and we tell them it is the plants, help, etc., we have received from Beldt's.

Yours truly,
Mrs. Chas. R. Snyder,
Pinckneyville, Ill.

Beldt's Aquarium, Inc.
Robertson, Mo.

I was very well pleased with the fish order and would like to thank you for the speedy shipment. I am enclosing another order.

Robert Kaffeldt,
LaCrosse, Wisc.

Beldt's Aquarium, Inc.
Robertson, Mo.

With reference to your letter, we beg to inform you that all the parcels sent us by post have arrived in perfect condition, and we thank you very much for effecting this dispatch in such an efficient manner.

J. Green & Co.,
Cairo, Egypt.

Beldt's Aquarium, Inc.
Robertson, Mo.

Although I have received nearly all the large aquarium supply companies' catalogs, including yours, I have found that your supplies are most nearly what I want, and I like your way of doing business.

Patricia Marr,
New York 21, N. Y.

Beldt's Aquarium, Inc.
Robertson, Mo.

My order arrived in good shape and I am well pleased. Thank you.

Yours truly,
Mrs. Irene Hatch,
Parma, Idaho.

Beldt's Aquarium, Inc.
Robertson, Mo.

Our order of tropical fish arrived safely, and we are more than pleased.

Yours truly,
V. W. Harris,
Pensacola, Fla.

Beldt's Aquarium, Inc.
Robertson, Mo.

Just received the 2-gallon drum bowl from you and would like to say that I am more than pleased with its quality and with the excellent job of packing that was done. I frequently receive broken glassware from such shippers as Sears-Roebuck, but I would have no fears about ordering fragile items from Beldt's after seeing this packing job.

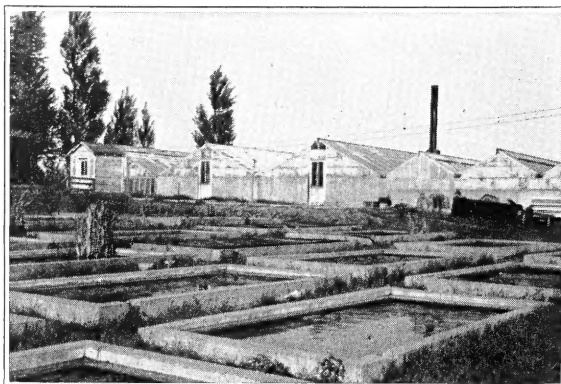

Appreciatively,
G. C. Ball, Jr., U.S.N.,
Lt. Commander,
Headquarters Caribbean
Command,
Quarry Heights,
Canal Zone.

LET US GET BETTER ACQUAINTED

Thanks to You

In Florissant Valley twenty miles from downtown St. Louis, is located a greenhouse much different than the average greenhouse. Instead of flowers it houses many varieties of tropical fishes and aquatic plants, also water lilies, snails and many other things you see listed in this catalogue.

A factory for the manufacture of fish aquariums and many other requirements for successful aquarium keeping is also in operation. A separate unit for the manufacture of fish foods is part of this unique hobby which has grown into a business covering several acres of buildings. This is the largest establishment of its kind in the world. More tropical fishes are produced here under glass in buildings than anywhere in this whole wide world.

It all started some fifty years ago when a small boy saw some tadpoles wiggling around a pond in a neighborhood pasture.

When you wrote us for this catalogue you indicated your interest in aquarium keeping. It is a fascinating hobby which may hold your interest for the rest of your life, or you may throw your aquarium into the ashpit in a short time. It all depends on whether you get the wrong or right start; not at all on how much money you may spend, but on how wisely you spend it.

For instance, if you buy the cheapest aquarium you are wasting your money. It will ruin your good table top and become a nuisance instead of a relaxation and pleasure.

aquarium keeping instead of learning the hard way, which is more costly and discouraging. A good clear knowledge of the underlying principles of maintaining an aquarium and fish will enable you to enjoy the hobby to its fullest extent, and in the forthcoming pages we shall acquaint you with as much information as possible.

Thanks for the inquiry.

Sincerely yours,

O. C. BELDT, President.

PRINCIPAL AQUARIUM REQUIREMENTS

An eastern or southern exposure is best. An hour of direct sunlight each day is beneficial but not absolutely necessary. Plant life can be maintained with aquarium reflectors. After you have decided where you are going to place your aquarium (No. 1 Don't), do not place it in a dark corner. Then you are ready to start from the bottom up.

Put only clean aquarium sand on the bottom, sand that is not too coarse nor too fine. Clean it thoroughly or get a bag of Beltd's Washed Aquarium Grit. Put about 1½ to 2 inches of this sand on the bottom. (No. 2 Don't) Do not use coarse gravel or a lot of small shells on the bottom; food and refuse will lodge among this, decay and cause plant roots to rot, water to foul, poisonous gases to develop which results in suffocation of fish life.

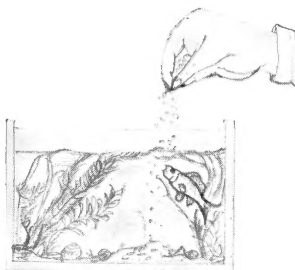

OVERCROWDING

Overcrowding the aquarium is a rather tough proposition to thoroughly understand. You can even put too many plants of a certain kind in an aquarium. Most of the bunch plants, such as Myriophyllum, Cabomba, Ludwigia, etc., which are tied in bunches should be taken apart and planted in single strands. Most all of these bunch plants will root if you will separate them and plant the cut ends in the sand. But if you leave them tied in bunches they will usually rot. Too many of these plants may produce carbon dioxide and consume oxygen to survive instead of producing oxygen. Certain varieties of plants cannot overcrowd the aquarium; for instance, Vallisneria can grow so thick that you may count 100 plants to the square foot and you could hardly plant it thick enough to cause any damage.

PLANTS PRODUCE AND ALSO CONSUME OXYGEN

When an aquarium receives sufficient light, the plants produce oxygen. At night plants consume oxygen. Plant life absorbs carbon dioxide and the refuse and droppings of fishlife. Plants which have grown and multiplied in an aquarium for a long period usually are beneficial and do not cause trouble. Only newly purchased plants, when freshly replanted and if too crowded, may be detrimental, so your No. 3 Don't should be, do not overcrowd plants; while the No. 4 Don't should be, do not overcrowd fish.

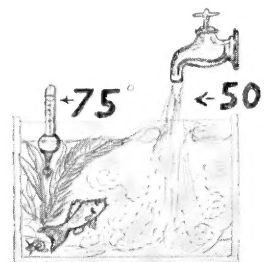

The only important factor of crowding fish life in the aquarium is water surface. Of course, artificial aeration will solve the problem of supplying oxygen to the fish. The greater the water surface of an aquarium the more fish it maintains in a healthy condition. If you ask, "How many fish can I put in an aquarium?" you will need a dozen answers. The size of the fish is the most important factor. Guppies and Moons, about four to the gallon. Fish from 1½ to 2 inches long, about two to the gallon.

OVERFEEDING

Overfeeding must be avoided at all times. Never more than one person should feed the fish. They seem to be hungry all the time. Surplus food should be siphoned off. Learn to feed only enough food so that the fish will consume all of it in 10 minutes. If the water becomes foul and

smells, it is a sure sign of decaying fish food. We also offer all of the principal live foods. Kindly check index under the heading of Live Foods.

TEMPERATURE CHANGES

An even temperature is very important. Great temperature changes may prove fatal; 75 degrees F. is a good temperature for the tropical aquarium. It suits all varieties; some may like it a little cooler. Never put cold fresh tap water in an aquarium to make up for evaporation. Use hot water, let it stand and cool off.

When starting a new aquarium, you usually have only drinking water available for this purpose. Drinking water usually contains a lot of chlorine, which is a deadly poisonous gas to fish life. It will linger in water even after it has stood for some time. The only safe way to start an aquarium is to use Clorout. When you put one tablet to a gallon of fresh water, it at once changes the chlorine gas into a friendly salt. We list this inexpensive chemical compound on page 30.

Just the same, let the tank set at least one day before you plant it and another day before you put fish in it. So your Fifth Don't should be, "Do not rush fish or plants into a newly setup aquarium."

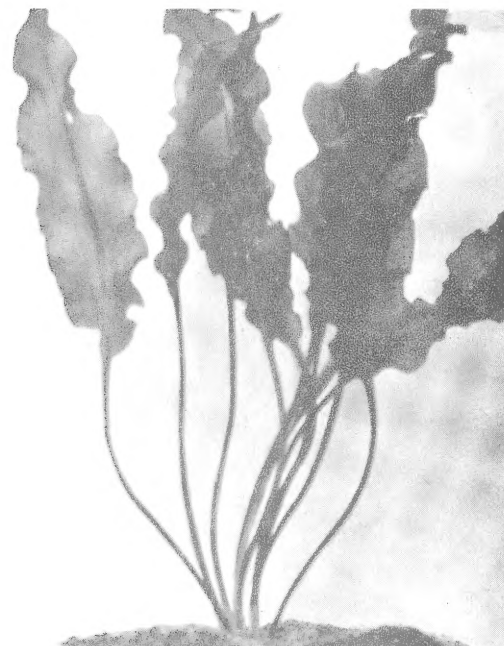

**Narrow Leafed
Amazon Sword
Plant**

Producing
leaves up to 1-
½" wide. Very
popular for
small and large
aquariums.
Each\$0.50

Greenhouse Grown

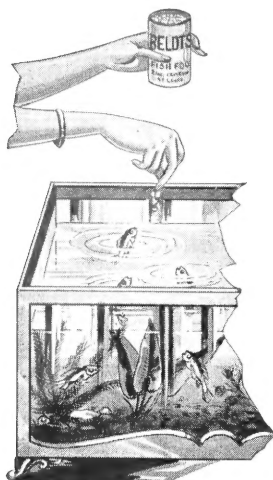

Round Leaf Spatterdock

The round leaves, up to 3 inches across, are somewhat translucent. An ideal low growing show plant.
Nice specimens, each.....\$0.50 Extra large.....\$1.00

Beldt's Aquarium, Inc.
Robertson, Mo.

I received the special collection which I ordered and which is the reason for this letter. The plants are ideal and extra plants must have been put in this group as there were many more than I even expected. All were of good color, and a large Mystery snail was included. All I can write is that I like to deal with people like you, and I will spread the word about. An honest business will certainly enlarge itself.

Thank you again.

My snails arrived in wonderful condition, every one alive and such a nice size.

Thanks,

Mrs. J. P. McLead,
Brownwood, Texas.

Beldt's Aquarium, Inc.
Robertson, Mo.

I received my shipment of fish, and want you to know they arrived in perfect condition. I am very much pleased with them; they are so pretty in color and so healthy looking. The female black mollie, which I received in the shipment had 14 baby mollies on the way, which are all sturdy little babies.

Most sincerely,

Mrs. H. Catton,
Monmouth, Ill.

Our 30 years of experience in shipping and breeding Fancy Fish assures you complete satisfaction. You not only save money but you also get good and strong developed stock. Order your Tropical Fish from Beldt's.

ALL PRICES QUOTED ARE FOR LARGE BREEDING SIZE FISH

Live Bearers

(Viviparous Killifishes)

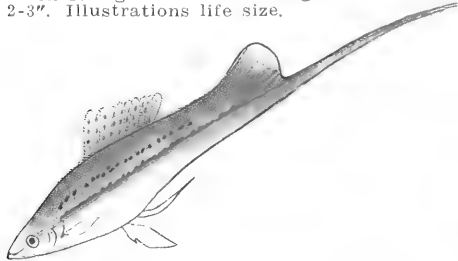

These Fish Bring Forth Their Young Alive

Live bearing, exotic fishes are very popular with the amateur, as no experience is necessary in order to breed these successfully. All you need is a good grade of prepared fish food so that the fish will have the proper nourishment, and nature will take care of the breeding end of it. Provide fine, bushy plants in the aquariums or separate the females and put them in a bowl by themselves when they look like they may be ready to have young.

Swordtails or Helleri

Live Bearer

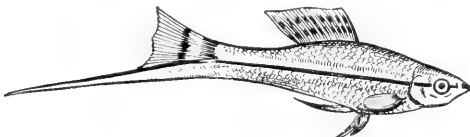

Swordtails are very popular. They are native in Mexico and Central America. The male develops a long spike. The original swordtail here listed are the Montezuma and helleri. All other varieties are the product of line breeding and hybridization. Some of them grow to a length of approximately 4" when full grown. The average size is about 2-3". Illustrations life size.

*Golden Swordtail, pair.....\$1.50

Special Panchax Collection
(Egg Laying Killifish)
Miniature Tropical Pikes

Special Collection No. 7

Collection Price—
5 pairs \$10.00

- No. 36 *Aplocheilichthys* Panchax. Per pair \$2.50
- No. 37 *Epiplatys* chaperae. Per pair 2.50
- No. 38 *Pachypanchax* Playfairii. pair 2.50
- No. 39 *Choriopeops* goodiei. Per pair 1.50
- No. 40 *Aphyosemion* (Ribbon tail panchax). Per pair 3.00

Here is a collection of extreme interest for the advanced aquarist as well as the novice. Killifish are quiet and will, sometimes for several minutes, stand in the same position without showing a sign of life. When food is thrown into the aquarium they dart quickly and snap the food. They can jump after the food high out of the water. The aquarium should be covered with glass.

South American Armored Scavenger Catfishes

(Corydoras)

Illustrations are natural size. These small catfishes are peaceful and good scavengers, very interesting, popular and hardy.

Corydoras aeneus
Colors, golden green shades.
Pair \$1.50

Quintana Atrizona

(Cuban Mosquito Fish)

This fish is similar to above illustration except it has about seven vertical bars. Body olive colored. Very recently introduced. Easy bred.

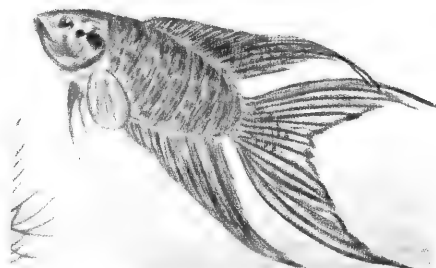

Pair	\$0.75	3 pairs	\$2.00
------------	--------	---------------	--------

Mosquito Exterminators

Hardy Gambusia Fish

A small cold water, live bearing fish; also eats fish lice. When placing about 6 pairs of them in a pool the lice soon disappear. They are hardy, same as goldfish.

Pair	\$0.75
3 pairs	\$1.25
Dozen	2.00
50 lot	7.50
100 lot	12.50
Shipping cans 60c extra.	

Macropodus Opercularis

(Red Paradise Fish)

Grows to a length of 3". Is a bubble nest builder. Comes from India and should not be mixed with very small fish. Fairly peaceful with most fishes of its own size.

Medium pairs	\$0.75
Large	\$1.00
Extra large	\$2.00

Beldt's Aquarium, Inc.
Robertson, Mo.

This Christmas my wife gave me a No. 24 aquarium, and the ornamental roller stand. They are the attraction of our living room.

Yours truly,
Waldemar Hackethal,
Plymouth, Mich.

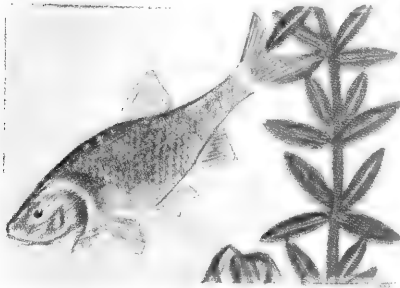

Beldt's Aquarium, Inc.
Robertson, Mo.

Please send me the following fish. You have a very excellent reputation among Akron fanciers. I sincerely trust that I can join the ranks of your satisfied customers.

Yours truly,
John W. Tengea,
Akron 1, Ohio.

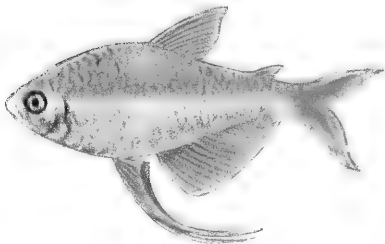

Tetras

Under this heading are listed many popular dwarf egg-layers. They lay their eggs on bushy plants. Later, hyacinth roots and myriophyllum are the best spawning plants. They are all peaceful and can be mixed. Prices are quoted for mature fish, breeding size; all select.

*Notropis Whipply

A very blue colored Characin with pink fins which during breeding time turn into a fiery red. Peaceful. Pair.....\$1.50

Brass-Tetra

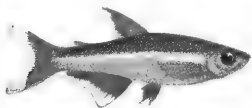

**Hypessobrycon bifasciatus*, pair.....\$1.00
3 for.....1.25

Jordanella Floridae (Flag Fish)

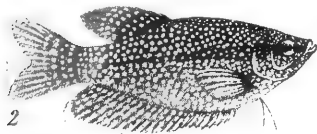

On account of its striped design and markings has been nicknamed Flag Fish. Body colors of red, blue, silvery and black scales. Females mostly greenish colored. Pair.....\$1.50

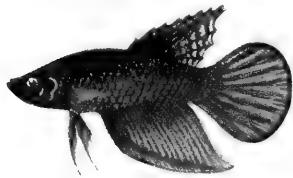

Labyrinth Fish

These Fish Build Bubble Nests

All Labyrinth Fish listed here are native in Southern Asia, such as India, South China, Island of the Borneo. All of these varieties build nests under floating leaves so that the nests are protected from rain. These nests are formed through the use of mucus and tiny plant life such as algae. Some varieties do not bother about building any nests. The eggs just float on the water's surface and are guarded by the male. Most all of the eggs hatch in 36 hours.

here listed are solid
colored fish. Body and
fins of one color.

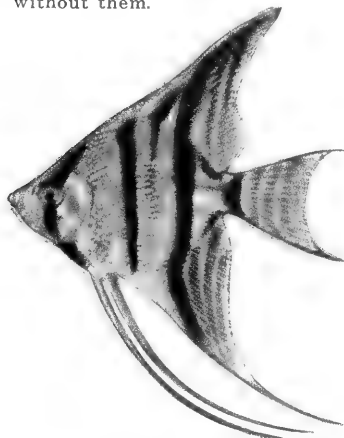

MINIATURE EXOTIC SUNFISHES

Have a high intelligence rating, beautiful colors, interesting breeding habits and take care of their babies. Supervise bringing up babies and protect them for several days, or weeks.

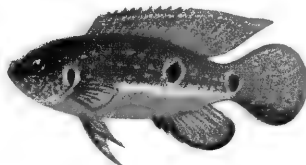

CICHLIDS

Most of these fish are from South America. The Amazon Basin offers quite a variety of these miniature foreign fishes. The Scalare or Angel Fish is a member of this family, as are all the other varieties listed under this heading. Most all of them lay their eggs on hard, smooth surfaces and when the eggs are hatched, take care of the young. An exception to this rule is the mouthbreeder. The female carries the eggs in her mouth for about ten days to two weeks in a special pouch. Their interesting breeding habits, and also their beauty, has made Cichlids one of the aquarist's favorite fish and no collection is considered complete without them.

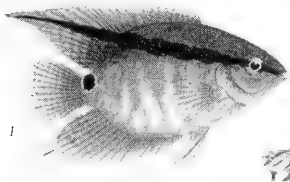

Pterophyllum Scalare
(Angel Fish)

*Scalare (Angel Fish).
*Young, pairs.....\$1.50; 6 for \$ 4.00
*Young breeders, each..... 2.50
1-year-old breeders, pair..... 7.50

Young, each...\$0.50 4 for...\$1.85

Cichlasoma Festivum
Young, each...\$1.00 Pair...\$4.00

Aequidens Maronii
An extremely peaceful Sunfish; very rare and not always obtainable. Breeding pairs.....\$5.00

Cichlasoma Biocellatum
(Jack Dempsey)

A wonderful show fish having many beautiful markings and colors which change with age. Will reach a length of 6".

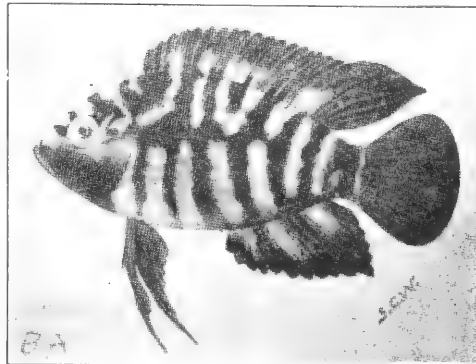

Young, 1", 3 for.....\$1.00
Medium pairs 2.50
Extra large pairs..... 7.50

Konga Cichlid

Very shy and peaceful. Body color dark brown with creamy tan-colored vertical bars.

Young, each \$0.50

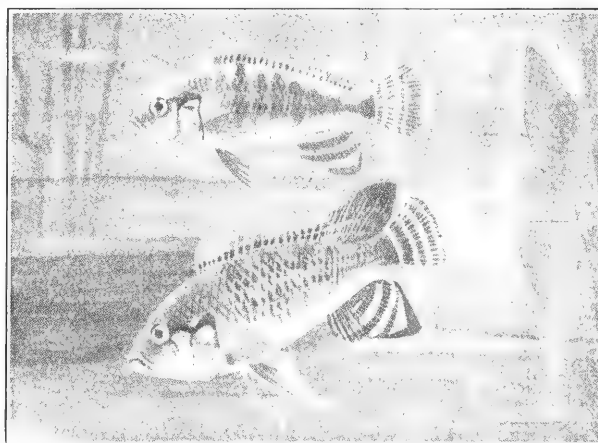

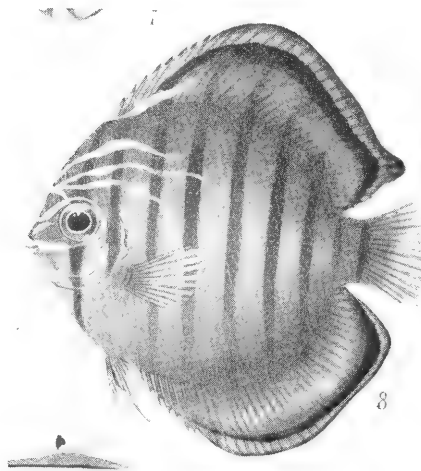

Breeding pairs, 3.00

Symphysodon Discus

Common name, Pompadour fish. These fish are still very rare and the supply is uncertain.

Price, pair...\$50.00 and up

Haplochromis Multicolor

(Egyptian Mouthbreeder)

They dig a depression in the sand and lay their eggs, which are fertilized by the male after they are laid. The female then picks the eggs up in her mouth, where she places them in a special compartment. Incubation period 10 days, during which time the female fasts. After the young, which may number as high as 50, emerge they swim back into their mother's mouth when there is danger.

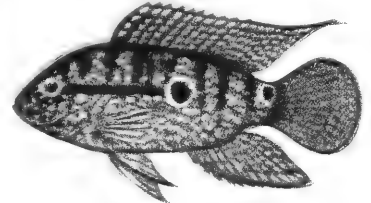

Medium pairs.....\$2.00 Large pairs.....\$3.00

Cichlids—Continued

Astronotus Ocellatus

One of the rarest and most interesting cichlids. Fish the size of illustration.
Each.....\$2.00 3 for.....\$5.00
If you want large breeding size fish, write for prices.

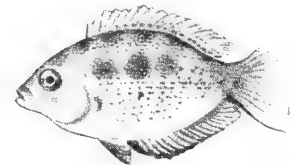

Aequidens Latifrons
(Blue Acara)

A peaceful Cichlid.

Young, each.....\$0.50
Breeding pairs 3.50

*Apistogramma pertense, pair 2.50

*Apistogramma agassizi, pair 4.00

Etoplus Maculatus
(Orange Chromide)

A peaceful dwarf sunfish from Brazil. Although claims have been made that they will grow to 3" long, three year old aquarium bred fish are about 2" long.
Medium size pairs.....\$2.00
Large pairs 3.00

Apistogramma Ramirezi
(Blue Sunfish)

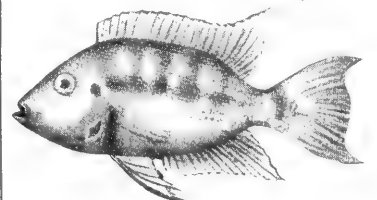

A violet blue Cichlid of recent introduction, will spawn on flat stones or inside of flower pot laid on its side.

Young, each\$1.50
Medium pairs 4.00
Grown pairs 6.00

Cichlasoma severum

These Cichlids will reach a length of 5" when grown.

Young fish, 1" size.....\$0.50
Medium pairs 3.00
Large pairs 5.00

Cichlasoma Meeki

A very peaceful Cichlid regardless of size; will not even bother grown guppies.

Young, 1" size, 3 for.....\$1.00

Medium pairs like illustration 1.50
Large breeding pairs 3.50

OBSERVATIONS

Almost every book on the subject of aquarium management begins with the fundamental principles of sustaining aquatic life which consists of sufficient space, sufficient light, sufficient oxygen, and sufficient food besides having the correct temperature.

OXYGEN

This may sound like a scientific challenge to the average beginner but these factors are extremely simple, in fact, they are so simple that they become hard to understand. It has only been a short time, so to speak, that men knew what oxygen is and that man knew he inhaled oxygen; and this happened towards the end of the 18th century. Before that man didn't even know that he breathed oxygen. He did know however that he had to have fresh air in order to live and you will soon find out after you set up your aquarium that the fish will have to have fresh water in order to live; that is, water which is not polluted with overfeeding, over crowding, or over planting. Keeping an aquarium for a year without having to clean it, change the water, have it looking crystal clear is just so simple that if we went about the right way of setting up this aquarium we would have no further difficulties. If we would only make certain minute observations in order to see that nothing goes wrong.

FILTER

The writer has kept aquariums absolutely crystal clear for a period of two years without spending much more than just a few minutes a week feeding the fish and replacing evaporated water and perhaps cleaning the filter thoroughly once a week. The relaxation afforded by observing fish life in an aquarium according to medical science is medicine for the mind and this medicine cannot be bought in a drug-store. It is yours free of charge as you sit down and watch the aquarium and your funny pets and the satisfaction which you feel in having and owning a nice aquarium with a good collection of tropical fishes or fancy goldfish.

COLORFUL PETS

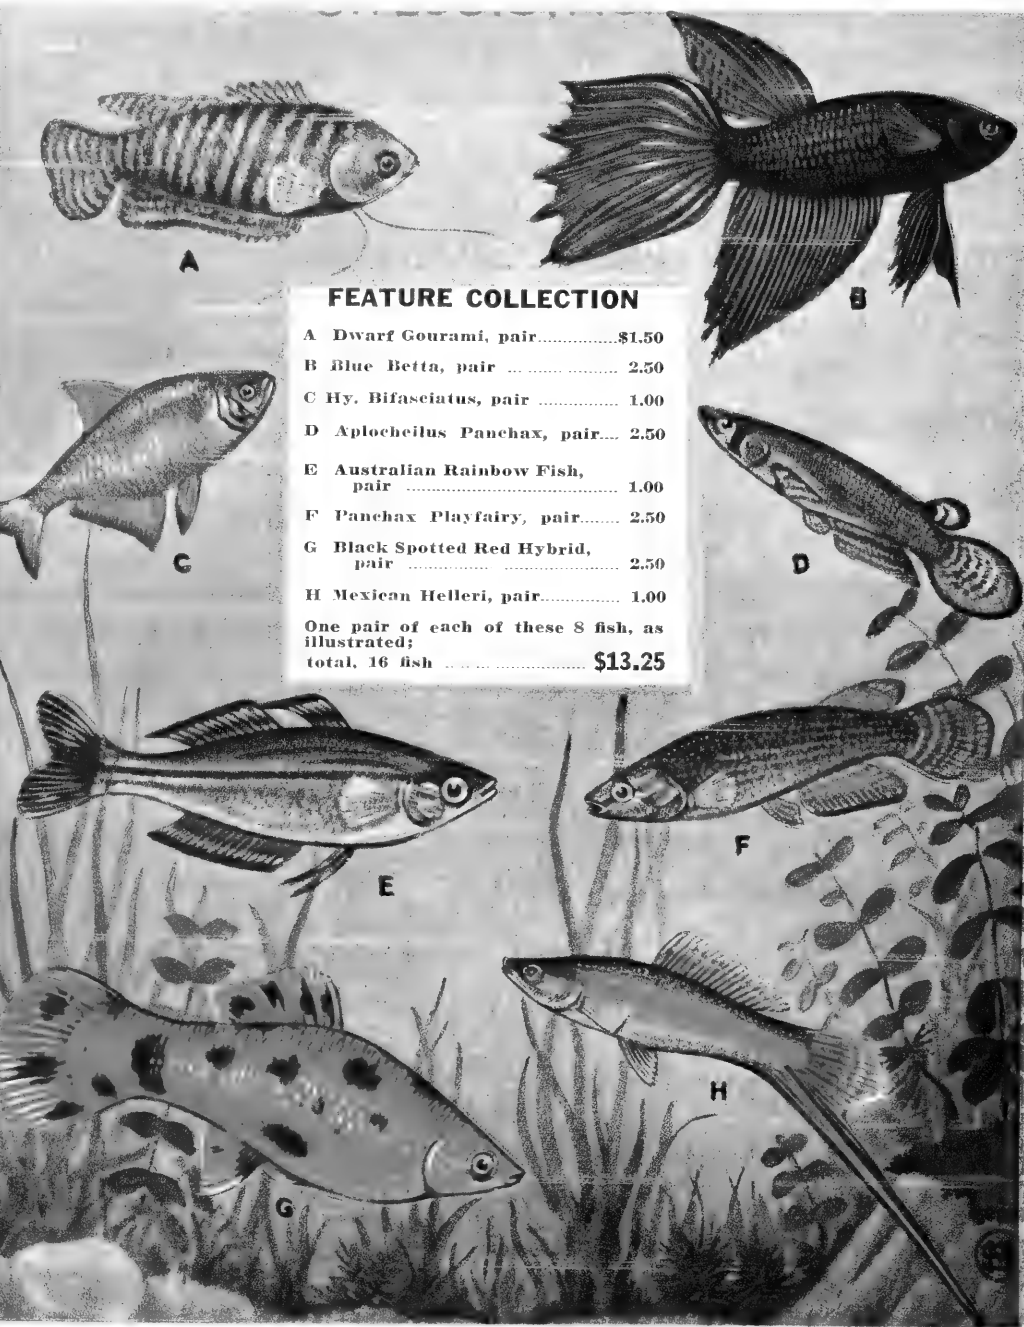

On account of the wide selection of colors and the many interesting shapes and breeding habits, tropical fish have during the past 25 years constantly displaced goldfish as a pet in the home aquarium, so that today perhaps there are more tropical fish sold than goldfish; so that the tropical fish industry has grown rather large from a very small beginning.

GETTING OLD

We published our first tropical fish catalog in 1928 and it may surprise you to know that at that time there was hardly a pet shop that handled tropical fish but the entire output was sold direct to fanciers—so that this tropical fish hatchery which we operate here in Florissant Valley, 18 miles from downtown St. Louis, has become a rather large business which operates on several acres which are covered with buildings and pools for the propagation of aquatic life, plants and fish, and also with buildings for the manufacture of various accessories and fish aquariums.

VERY SIMPLE

By now the reader will have become disgusted because all we are doing is bragging about how big we got. But that is not the point which we are

FEATURE COLLECTION

Here is a fine collection of 16 Tropical Fish for a 10-gallon aquarium. All have brilliant colors; are easy to feed and take care of. Very hardy and active.

Regular Catalogue Value.....\$14.50

Special Collection Price Only.....\$13.25

Insulated shipping containers, \$1.25 extra

GET A GOOD BOOK

It would be impossible for us to even begin to try to give you the necessary information required for aquarium success. There are a lot of things which you can find out by reading a book but there is nothing as valuable as your own observations. Try to study the mistakes you have made if something goes wrong. Ninety times out of a hundred it is either overcrowding or

overfeeding. While we are on the subject of information we cannot recommend "Exotic Aquarium Fishes" too highly. William T. Innes has spent a lifetime printing and developing information of value to the fish fancier and really all you need for aquarium success is a keen, observing eye. Always remember there is a reason for everything and that includes failure and success.

trying to bring out. We are just trying to bring out to you one factor and that is how simple it must be to maintain an aquarium and how little time it must take to take care of hundreds and of thousands of fish if you have the right setup and equipment; so the real point which we are actually trying to bring out is that it is extremely simple to maintain a nice aquarium in your living room.

The Pep Collection

In assorting this collection, we had in mind a lot of speed. All of these varieties are extremely lively and they swim rapidly and are constantly moving. They combine beautiful colors with peaceful habits and extreme hardiness being not affected by temperature changes like other varieties. We offer this collection especially to beginners as they require very little care. The illustrations are slightly larger than shipping size and have been made from well developed and older fish. M signifies male and F female.

I wish to thank you for the beautiful 15-gallon aquarium which arrived in the early winter. It is perfect, and I want to thank you for both shipments of goldfish and snails.

As ever,

Mrs. G. C. Hansen,
Randolph, Kansas.

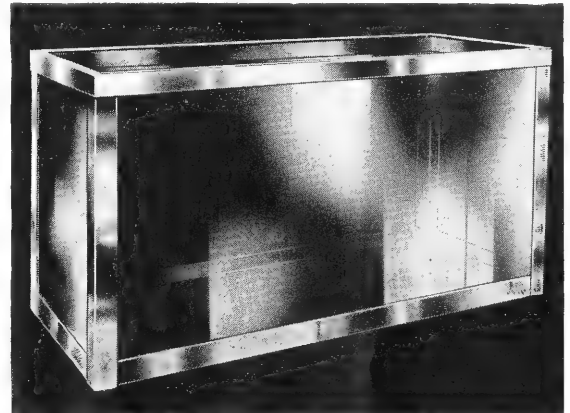

Beldt's Aquarium, Inc.
Robertson, Mo.

The fish arrived today and every one was alive and in good condition. Our man is very pleased with the beautiful collection of fish you sent us.

We again want to thank you for your donation of tropical fish.

Very truly yours,

Louis von Behren,
Commander D.A.V. Chapter No. 10,
Vincennes, Ind.

Stainless Steel Deluxe Display Aquariums

The Little Giant Crystal filter is a submergible type filter especially designed for larger aquariums. The pump itself which needs never to be oiled, is 3 1/4" square, is completely waterproof and the motor is oil sealed. The unit is guaranteed for six months but should operate for six years without any repairs. The Little Giant Crystal Filter will operate only on 110 volt 60 cycle current. It is a triple action filter designed especially for larger aquariums. It filters and aerates at the same time. Capacity 150 gallons per hour.

The Little Giant Crystal Filter is designed to operate continuously. It is absolutely noiseless and free from vibration and it is impossible to hear the motor three feet away from the aquarium. The Little Giant Crystal Filter is fully guaranteed and it will filter the average 20-gallon aquarium crystal clear in 10 minutes. It is an ideal aerator especially for dealers and it operates so efficiently that several thousand tropical fish may be kept in a 100 gallon tank in perfect condition. Price complete as illustrated with 10 ft. cord.....\$37.50

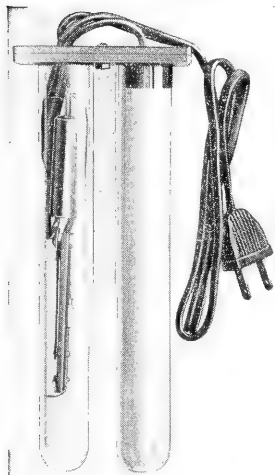

Little Giant Water Pump without attachments, including 10 ft. waterproof rubber cord.....\$22.50

When ordering specify the depth of the aquarium in which you intend to operate this filter.

Dear Sir:

I received my order of tropical fish in good order. I am returning your can by parcel post today. I do not know if there is a credit for its return, but I am sending it back for re-use. If there is a credit for it send me a credit slip, but if there is not just consider the return as my appreciation for your good selection of fine fish.

Yours truly,

John A. Reddy,
Kearney, Nebraska.

Beldt's Aquarium, Inc.
Robertson, Mo.

Dear Sir:

Thank you for my order which reached me on the 12th of October in good condition, and which my fish are thoroughly enjoying.

Very truly yours,
Janet B. Harden,
Masonville, N. J.

Beldt's Aquarium, Inc.
Robertson, Mo.

Dear Sirs:

We have a 2-gallon aquarium for our guppies and would like to get some fish food. Our neighbor is pleased with your order and she gave us your address.

Respectfully,

Mrs. Lloyd E. Davis,
College Park,
Staunton, Virginia.

BELDT'S RELIABLE REMEDIES

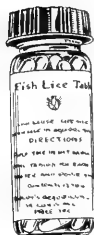

It
Knocks
the
Spots

Beldt's Fungus and Ich Remedy

This is the most effective remedy for fungus, tail rot, and especially ichthyophthirius on tropical fish. Symptoms: Folded fins, fish wiggle, and seem to be unable to swim, scratch themselves on sand. Tropical fish have tiny white spots on bodies — cotton-like growth. This remedy should be on hand as these diseases are contagious and spread rapidly. Complete directions with every bottle.

Price, 1-oz. bottle.....\$0.25
3 for \$1.00

Fish Lice Capsules

FISH LOUSE

A newly discovered remedy that destroys hydra and fish lice. Use one capsule for 10 gallons of water. Contents 12 capsules.

Price.....\$0.75

FISH DISEASES

In speaking of fish diseases, it is well to mention that if the proper steps are taken to prevent them, very little, if any, trouble can be expected with fish diseases in a goldfish pool. Once a pool is established, it is very seldom that the fish get sick unless, of course, you clean the pool and put the fish back in fresh water. There is usually too much chlorine gas in fresh water.

CHLORINE GAS

So, before you put the fish in fresh water, be sure that you treat this water with Clorout, the chemical which changes the chlorine gas into a friendly salt. The fish can be placed in such a pool a few minutes after it has been treated. Complete directions come with this chemical.

See Page 30 for Prices on Clorout

Beldt's Aquarium, Inc.
Robertson, Mo.

I have received your shipment in good condition and I am more than satisfied. Three years ago I bought a small aquarium from you. Now I have over 20.

Kindly yours,
Ray Bernier,
Quebec, Canada.

Illustrating 90 fish in natural colors. Size 19x28 inches. Also gives habitat and breeding habits.

Price Postpaid \$1.50

Goldfish Varieties and Water Gardens

By WILLIAM T. INNES

This book illustrates many varieties of goldfish and goes into detail about goldfish breeding. Water lilies are well represented and pool management is better understood after reading this book, covering aquatic plants, fish diseases, pool construction, food and etc. 382 pages. Price \$5.00

The Aquarium

A monthly magazine published in Philadelphia. This is a real fish fancier's magazine.

Subscription per year \$2.50
Canada and Foreign Countries, \$3.00

"Guide to the Study of Fresh Water Biology"

By

JAMES G. & PAUL R. NEEDHAM

88 pages. Only the things which are commonly collected in fresh water are included in the book. It covers Insects, Crustaceans, Molluscs, Plancton Protozoans, Arthropods and many subjects too numerous to mention. A fine book covering the subject in a most complete manner. Price \$1.75

"The Modern Aquarium"

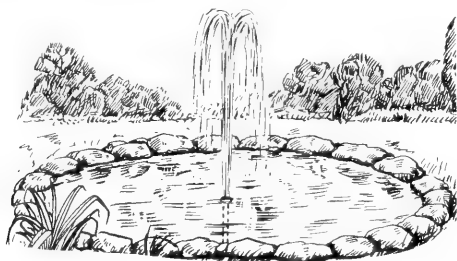

By WILLIAM T. INNES

A very good book for the beginner, with 30 illustrations and 64 pages crammed with information describing goldfish, tropical fish, aquatic plants, insect enemies, breeding habits, fishfood, snails, aquatic plants, etc. Price \$1.00

"Your Aquarium"

by WILLIAM T. INNES

A 32-page booklet, well illustrated, for the beginner. It explains so that everyone can easily understand all of the fundamentals of aquarium success. 30 Cents

FOUNTAINS

If interested in pool fountains and filters, send for our special circular.

Beldt's Aquarium, Inc.
Robertson, Mo.

I am a discharged veteran and am seriously contemplating a retail business venture with emphasis on pets and supplies. I had some experience with your firm as a retail customer some years ago and was completely satisfied with the quality of both your fish and your service, and incidentally managed to remember your firm name all of this time.

Thanking you in advance for any assistance you may be able to provide.

Chas. H. Page, Jr.,
Charlottesville, Va.

LIVE FOODS FOR FISH

White Worms (Enchytra)

Portion. \$1.50

To propagate white worms, fill a small box about 12 inches square and 12 inches deep with good garden soil to a depth of 8 inches; keep a piece of slate or glass on top to keep soil from drying. Keep dirt moist. Feed mashed potatoes, boiled rice, bread soaked in milk. See that all food is covered with dirt. Breeding temperatures best between 50 and 75° F.

Infusoria Cultures

Various microscopic life forms the foundation of water life. Without these creatures there would hardly be a living thing in water. Infusoria is used for feeding tiny baby egg-layers of all tropical, goldfish and most all fresh water game fish subsist on this microscopic life during the first few weeks of their existence. We can supply following cultures: paramecium, philodino, Euglena, and monostyla. These cultures cannot be shipped in zero weather on account of water freezing. Each \$1.25

Tubifex Worms

A small reddish colored worm, similar to white worms. They will live under water for months, making it possible to feed your fish enough for several days if you are away. Per portion, including shipping can \$2.00

Live Daphnia

If you wish to raise your own daphnia, get a can of live daphnia and one package of our Infusoria Powder, which is also used for raising daphnia. Complete directions with every package. Live daphnia, including shipping can \$2.00

Brine Shrimp Eggs

The eggs will keep indefinitely. Young hatch in 24 hours, and make ideal live food for tropicals. Full directions with each package.

Per bottle \$0.75

Frozen Brine Shrimp

This is an ideal fish food and is most likely just as valuable as live fish food, if not more so because it can be kept in your refrigerator. As long as you can keep it frozen it will last indefinitely. We cannot send this frozen brine shrimp by parcel post but it has to be shipped by express packed in dry ice. We make a packing charge of \$1.00 for dry ice and boxing. It can also be shipped by air express.

PRICE LIST

	Each	Per Doz.
1 oz. packs	\$0.25	\$2.50
3 1/2 oz. packs	0.75	7.50
1 pint	1.50	

Before ordering contact your local tropical fish dealer. He may stock this frozen brine shrimp.

Magic Infusoria Powder Size of Package, 4x2 1/2 inches Beldt's Magic Infusoria Powder

One eight-ounce box is enough to produce fifty gallons of infusoria. When breeding egg-laying tropicals or goldfish, the young, after they are able to swim, must be fed on infusoria. All young live bearing fish can be fed on infusoria for about ten days. This powder, which is guaranteed to produce the best infusoria culture, should be on hand. In case you do have some egg-layers to spawn, you will need these small infusoria microbes for food. Price per can \$0.50

Tripod Magnifier

The Tripod Magnifier is highly satisfactory for students' use in elementary Nature Study, such as Biology, Botany, Entomology, and other simple laboratory tasks.

Each \$1.50

Pocket Magnifier

This powerful magnifier supplied with 2" lens on revolving leather case. Ideal and handy for the fish fancier for checking infusoria, etc. Each \$1.25

PLEASE READ TERMS AND INFORMATION

All tropical fish are best shipped in insulated containers the year round. They thrive best at a temperature between 65 and 80 degrees F. During cold weather, more insulation is used to keep the water warm. During hot weather, insulation is necessary to keep the water from becoming too hot, but less insulation is required during the summer months. We supply these insulated (not returnable) shipping containers for \$1.50 each, and this amount should be added to your order for tropical fish.

During cold weather chemical heating pads can be supplied at 75c each.

Forwarding

All prices quoted in this catalogue are f.o.b. St. Louis. We do not prepay any shipments or parcels. Some articles such as any kind of plants, fish food, heaters, remedies, supplies, reflectors, air pumps and ornaments can be sent by parcel post insured.

Kindly add sufficient postage and insurance. We do not guarantee live snails sent through the mail. You will have to insure these parcels and file your own claims for losses.

Live fish can be shipped by regular express and air express. Glass aquariums and other large glass items are best sent by express because they are automatically insured. Do not remit express charges to us but pay the express charges when shipment is delivered to you.

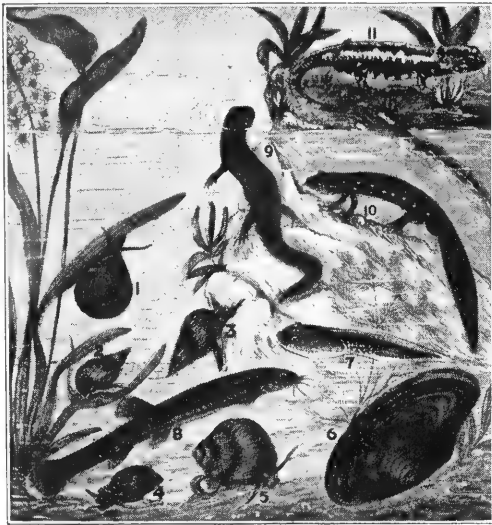

Claims and Live Delivery Guarantees

We do not guarantee the live delivery of live stock and ship all live stock entirely at your risk. In case of loss you will have to file your own claims with Carrier.

Taxes

Missouri residents must add 2 per cent retail sales tax to all orders. All federal, state or local taxes imposed after this catalogue is printed will be added to all prices.

The Little Giant Crystal filter is a submergible type filter especially designed for larger aquariums. The pump itself which needs never to be oiled, is 3½" square, is completely waterproof and the motor is oil sealed. The unit is guaranteed for six months but should operate for six years without any repairs. The Little Giant Crystal Filter will operate only on 110 volt 60 cycle current. It is a triple action filter designed especially for larger aquariums. It filters and aerates at the same time. Capacity 150 gallons per hour.

The Little Giant Crystal Filter is designed to operate continuously. It is absolutely noiseless and free from vibration and it is impossible to hear the motor three feet away from the aquarium. The Little Giant Crystal Filter is fully guaranteed and it will filter the average 20-gallon aquarium crystal clear in 10 minutes. It is an ideal aerator especially for dealers and it operates so efficiently that several thousand tropical fish may be kept in a 100 gallon tank in perfect condition.

BELDT'S RELIABLE REMEDIES

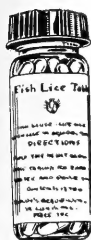

**It
Knocks
the
Spots**

Beldt's Fungus and Ich Remedy

This is the most effective remedy for fungus, tail rot, and especially ichthyophthirius on tropical fish. Symptoms: Folded fins, fish wiggle, and seem to be unable to swim, scratch themselves on sand. Tropical fish have tiny white spots on bodies — cotton-like growth. This remedy should be on hand as these diseases are contagious and spread rapidly. Complete directions with every bottle.

Price, 1-oz. bottle.....\$0.35
3 for \$1.00

Fish Lice Capsules

FISH LOUSE

A newly discovered remedy that destroys hydra and fish lice. Use one capsule for 10 gallons of water. Contents 12 capsules.

Price\$0.75

FISH DISEASES

In speaking of fish diseases, it is well to mention that if the proper steps are taken to prevent them, very little, if any, trouble can be expected with fish diseases in a goldfish pool. Once a pool is established, it is very seldom that the fish get sick unless, of course, you clean the pool and put the fish back in fresh water. There is usually too much chlorine gas in fresh water.

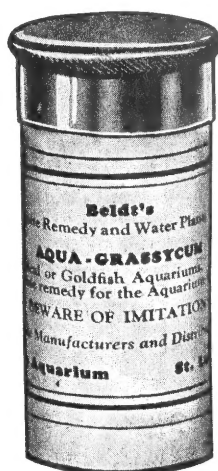

CHLORINE GAS

So, before you put the fish in fresh water, be sure that you treat this water with Clorox, the chemical which changes the chlorine gas into a friendly salt. The fish can be placed in such a pool a few minutes after it has been treated. Complete directions come with this chemical.

Brine Shrimp Eggs

Per bottle\$0.50

Aqua Grassycum

Actual Size of Small Size

Contains a 2% solution of acraflavine, a new remedy which will prove very dependable. Good for mouth fungus. Complete directions with every bottle.

Price per bottle.....\$0.35
3 for \$1.00

Beldt's Special Pool Remedy

To be used in large pools for gold and tropical fish. This remedy comes in powdered form complete with directions. Four-ounce jars, enough to sterilize about 2000 gallons of water.

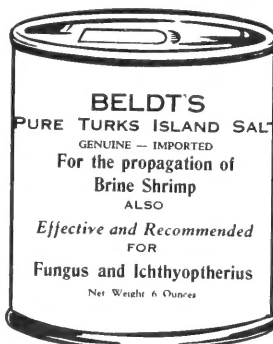

Price\$1.50

Beldt's Fungus Powder

A tonic to be used for sick as well as healthy fish. Its main purpose is to create pure water conditions and keep aquariums free from diseases. It is a remedy for sick fish, and a good tonic for well fish. It is greatly advisable to use this tonic when starting new aquariums. Complete directions with every carton.

Each\$0.35
3 for \$1.00

Turks Island Salt

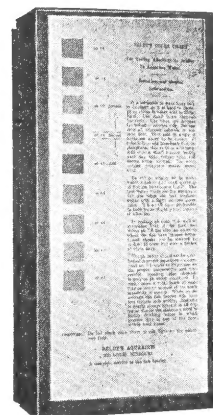

A solution of two level table-spoonfuls of Turks Island Salt per gallon of water makes a tonic which is beneficial to all minor ills. Fish should be left in this bath for several days.

Each\$0.30

Beldt's Sulphuro Fish Remedy for Tropical and Goldfish

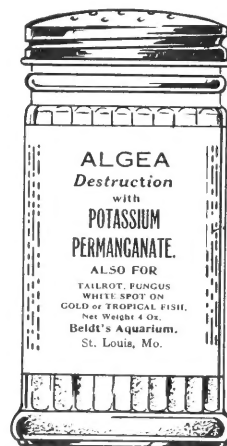

Directions for its use come with every bottle. Price.....\$0.50

Beldt's Aquarium Testing Kit

This kit contains chemicals to neutralize water in case it is acid or alkaline. It contains the testing liquid test tube and color chart to show you exactly how the water tests. Extreme alkaline or acid conditions of water are very harmful to fish and many times diseases can be cured or prevented. If you have trouble with your aquarium, test the water.

THERE IS NO SUBSTITUTE FOR QUALITY

SCAVENGERS FOR AQUARIUMS AND POOLS

Do not try to keep an aquarium or a pool without the proper kind of scavengers. They are very important in keeping an aquarium or pool clean. Clams should never be used in an aquarium. They should only be used in pools, as the average aquarium is much too small. Figure at least one snail to the gallon of water when keeping an aquarium, and if you use the large Japanese snails, use at least a dozen snails for each 50 gallons of water in the pool, and figure one Weatherfish for each 10 gallons of water in the aquarium besides the snails.

Water Newts or Salamanders are very interesting, but have no scavenger value. Tadpoles make very good scavengers in both pools and aquariums. Scavengers consume very little oxygen and, therefore, will not overcrowd the aquarium.

Add 25¢ for postage and packing charges on snail orders amounting to less than \$1.50, unless ordered with other supplies.

Nest Building Sticklebacks A Cold Water Fish

These can only be shipped from October to May.

If you have an aquarium in a cold room over the winter try these Sticklebacks. They will stand any temperature above freezing. They collect bits of plant twigs from which they construct a nest. Spawn in April and May. Pairs \$1.50

Miniature Goldfish

We can supply small miniature dwarf goldfish approximately 1 to 1½" long. These small goldfish can be kept just like tropical fishes in aquariums planted with ornamental and oxygenating plants. They do not require warm water but will stand any temperature above freezing and can be shipped the year round.
